Customer Success

Integrator

Dendrio implements truly **integrated IT solutions**, focusing on secure on-premise/cloud infrastructures.

We discuss hardware, software and services for designing and deploying complex architectures for networking and datacenter.

We believe that technology is **the most important option** to develop modern companies.

Secured Hybrid Multi-Cloud

And more precise, we believe **Secured Hybrid Multi-Cloud** is the main tool used to turn IT platforms into modern companies.

Integrated IT solutions and services

We deliver integrated IT services based on cloud, security, networking and complete mobility solutions, respectively software applications with various licensing options.

Cloud

Security

Networking

Digital and modern workplace

Cloud – public, private, and hybrid

We have significant expertise in design, migration, operation and support of cloud-based infrastructures.

Dendrio is the largest provider of solutions and services for the implementation, optimization and operation of hybrid or full-cloud (public/private) – AWS and/or Microsoft Azure.

Security

- IPS & Vulnerability assessment

- Identity management & access control

- SIEM

- Anti-malware

- Firewall and VPN

- Data loss prevention

We approach security both as a product (for SMB companies) and as a service (preceded by security audit and performance for large companies).

Digital transformation and hybrid systems push security perimeters beyond your company's headquarters into the Cloud, Data Center, and mobile workers' devices. That's why Security policies need to become more complex and agile than ever.

Networking

- Routers

- Structured cabling

- Switches

- Wireless

An ideal network is always available, fast, reliable and secure.

Dendrio offers network solutions for SMEs, branches, headquarters, for the local datacenter or expanding the network into a public cloud. This means less time spent on troubleshooting IT problems and connecting devices and more time to improve business results.

Digital & Modern Workplace

- Business applications

- Graphic production

- Communication and collaboration

From business applications, to collaboration and communication solutions, computer-aided design or tools for graphic production, we provide customers with an extensive portfolio of tools from the top vendors.

We add the skills of our engineers for audit, support, implementation and project management.

Certifications portfolio

+375

Technology partners

25

Certified engineers

29

Our team members are creative consultants with experience in carrying out complex projects, as well as IT professionals with a solid portfolio of certifications.

These competencies are always certified and constantly updated by our partners.

Partnerships
